

ALBANIA

Ornela Bardhi

Computer science and engineering

A young Albanian woman, Ornela Bardhi is a graduate in Pervasive Computing and Communication for Sustainable Development.

Her research focuses on the application of machine learning techniques and algorithms to medical data, specifically to electronic health records, where patient information is stored.

She is founder and co-founder of two start-ups, in Sweden and Finland, respectively. She has also been a jury member for the Albanian ICT Awards, one of the main technology events in Albania. Two years ago, she was one of the finalists of the Women in Tech Awards and is the youngest jury member since it was created eight years ago.

She is a Marie Curie Ph.C. Fellow and will be defending her Ph.D. in October 2021 in Bilbao, Spain. As part of the Marie Curie Alumni Association, where she holds the position as a board member for the Western Balkans Chapter and the National Representative for Albania, she has organized various science events, particularly research ethics, in the region.
