(54) Title: METHOD FOR PRODUCING L-CARNITINE FROM CROTONOBETAINE		
(54) Bezeichnung: VERFAHREN ZUR HERSTELLUNG VON L-CARNITIN AUS CROTONOBETAINE		
(57) Abstract		
<p>The invention relates to a method for producing L(-)-carnitine. The aim of the invention is to depict a method which permits the synthesis of L(-)-carnitine from crotonobetaine, crotonobetaine salts or derivatives in an ecologically advantageous manner by immobilizing cells of <i>Escherichia coli</i> 044 K74 in a continuously operating cell recycle reactor. Growing or resting cells of <i>E. coli</i> are retained in a continuously operating cell recycle reactor by micro or ultrafiltration membranes which are arranged as a flat membrane module or hollow chamfer module.</p>		
(57) Zusammenfassung		
<p>Die Erfindung betrifft ein Verfahren zur Herstellung von L(-)-Carnitin. Das Wesen der Erfindung besteht darin, ein Verfahren dazustellen, daß in ökonomisch vorteilhafter Weise die Synthese von L(-)-Carnitin aus Crotonobetain, Crotonobetainsalzen oder Derivaten durch immobilisierte Zellen von <i>Escherichia coli</i> 044 K74 in einem kontinuierlich arbeitenden Zell-Recycle-Reaktor erlaubt. Wachsende oder ruhende Zellen von <i>E. coli</i> werden in einem kontinuierlich arbeitenden Zell-Recycle-Reaktor durch Mikro- bzw. Ultrafiltrationsmembranen, die als Flachmembran- oder Hohlfasermodule angeordnet sind, zurückgehalten.</p>		

INTERNATIONAL SEARCH REPORT

International Application No

PCT/EP 98/07124

A. CLASSIFICATION OF SUBJECT MATTER
 IPC 6 C12P13/00 C12P1/00

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)
 IPC 6 C12P

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category °	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
X	CHEMICAL ABSTRACTS, vol. 115, no. 1, 8 July 1991 Columbus, Ohio, US; abstract no. 6956, JUNG, H. ET AL: "Production of L(-)- carnitine by biotransformation" XP002096268 see abstract & DECHEMA BIOTECHNOL. CONF. (1990), 4(P.T. B, LECT. DECHEMA ANNU. MEET. BIOTECHNOL. 8TH, 1990), 1041-4 CODEN: DBCOEU, --- -/--	1

Further documents are listed in the continuation of box C.

Patent family members are listed in annex.

° Special categories of cited documents :

- "A" document defining the general state of the art which is not considered to be of particular relevance
- "E" earlier document but published on or after the international filing date
- "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- "O" document referring to an oral disclosure, use, exhibition or other means
- "P" document published prior to the international filing date but later than the priority date claimed

- "T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- "X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- "Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- "&" document member of the same patent family

Date of the actual completion of the international search

11 March 1999

Date of mailing of the international search report

25/03/1999
