(54) CREAM APPLICATOR FOR FOOTWEAR

(57) The invention relates to a cream applicator for footwear, comprising a discoid base (1). One of the faces of the aforementioned base is provided with a rim (3) which holds a cylindrical spongy component in place, while the other face thereof comprises a diametrical bridge-type grip element (2). The lower part of said bridge defines a hole (4) comprising a central raised area (5), such that it can be gripped with two fingers. The

aforementioned grip element (2), which consist of a rigid part comprising three arcs and a central raised area (6), is made from a thin discoid part (8) comprising two opposing semi-circular wings (9,10) which extend out from a diametrical segment (11) and which are articulated to same by means of two bend lines (12,13). Moreover, said wing comprise aligned holes which are used to fix the device thereto and pairs of symmetrical lugs (16,17) (fig. 1,2 and 3).
