(54) Title: CREAM APPLICATOR FOR FOOTWEAR

(54) Título: APLICADOR DE CREMAS PARA EL CALZADO

(57) Abstract: The invention relates to a cream applicator for footwear, comprising a discoidal base (1). One of the faces of the aforementioned base is provided with a rim (3) which holds a cylindrical spongy component in place, while the other face thereof comprises a diametrical bridge-type grip element (2). The lower part of said bridge defines a hole (4) comprising a central raised area (5), such that it can be gripped with two fingers. The aforementioned grip element (2), which consists of a rigid part comprising three arcs and a central raised area (6), is made from a thin discoidal part (8) comprising two opposing semi-circular wings (9, 10) which extend out from a diametrical segment (11) and which are articulated to same by means of two bend lines (12, 13). Moreover, said wings comprise aligned holes which are used to fix the device thereto and pairs of symmetrical lugs (16, 17) (fig. 1, 2 and 3).

(57) Resumen: Aplicador de cremas para el calzado, que comprende una base (1) de forma discoidal, dotada en una de sus caras de un reborde (3) para la retención de un componente esponjoso de forma cilíndrica, y en su otra

cara, un elemento sujetador (2) en forma de puente diametral que define en su parte inferior una abertura (4) con una elevación central (5) que facilita su prensión por dos dedos de la mano del usuario. Un elemento sujetador (2) consiste en un puente rígido de tres arcos con una zona elevada central (6), y está constituido por una pieza discoidal delgada (8) formante de dos aletas semicirculares (9,10) en oposición, derivadas de un tramo diametral (11) y articuladas al mismo mediante sendas líneas de flexión (12,13) presentando dichas aletas aberturas en correspondencia para la sujeción del dispositivo y pares de tetones (16,17) en simetría (Figs. 1,2 y 3).

INTERNATIONAL SEARCH REPORT

International application No.

PCT/ ES 03/00211

A. CLASSIFICATION OF SUBJECT MATTER

IPC7 'A47L 23/04, A47K 7/00

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

IPC7 A47L, A46B, A47K

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

MISTRAL, WPI, EPODOC

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category*	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
A	ES 1021353 U (GLOSS ESPANA PRODUCTS INTERNACIONAL S.A.) 01.11.1992. the whole document	1,2
A	US 5615440 A (COWAN et al.) 01.04.1997. column 3 line 4-column 4, line 21; page 1-4	1,3

A	EP 404500 A3 (CLIMBMINSTER LIMITED) 27.12.1990. column 6, line 30-column 7, line 27; figures 1-4	1

☐ Further documents are listed in the continuation of Box C.☒ See patent family annex.

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier document but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
