<p>(54) Title: METAL FITTING FOR LEVEL HANGING OF FRAMES OR SMALL OBJECTS</p> <p>(54) Título: HERRAJE PARA COLGAR CUADROS O PEQUEÑOS OBJETOS A NIVEL</p> <p>(57) Abstract</p> <p>The invention relates to the systems for hanging paintings, frames or any such small object. The technical problem addressed is the stability of such fixing systems in order to maintain a fixed level of the object and at the same time drilling only one hole into the wall thereby avoiding the need to make various holes in order to hang and fix one painting or frame to the wall. To this effect, the invention comprises a pair of metal fittings which are shaped as a rectangular folded plate and which are couplable to each other by means of a longitudinal groove in order to reduce the swinging movements between the parts. Also, in order to avoid the oscillation of the anchoring point, the latter has protuberances which penetrate into the wall when tightening the screw and thereby block the position of the metal fitting in a preferably horizontal position. The metal fitting can be easily fabricated by punching or pressing of metal materials or injected plastic material. It is mainly intended to hang frames such as paintings or the like at any location and provides for their easy interchange without having to move them during cleaning.</p> <p>(57) Resumen</p> <p>La invención reivindicada pertenece al sector técnico de los anclajes para cuadros o pequeños objetos. El problema técnico que pretende resolver es el de conseguir un sistema de fijación estable que permita mantener un nivel fijo efectuando un sólo orificio en la pared evitando la necesidad de hacer varios agujeros para colocar fijo un cuadro. La esencia de la invención consiste en un par de herrajes, con forma de plantilla rectangular, plegada, acoplables entre sí a través de una ranura longitudinal que permite pocos movimientos de balanceo entre las piezas; así mismo para evitar la oscilación del punto de anclaje éste presenta unos salientes que se clavan en la pared al apretar el tornillo y bloquean la posición en que se coloque el herraje, preferentemente horizontal. De fácil fabricación mediante troquelados metálicos o plásticos inyectados, su uso principal es para colgar cuadros en todo tipo de lugares y permitir su intercambio fácilmente y que no se muevan al limpiarlos.</p>		

INTERNATIONAL SEARCH REPORT

International application No.

PCT/ES 98/00137

A. CLASSIFICATION OF SUBJECT MATTER

IPC⁶ A47G 1/16

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

IPC⁶ A47G

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

CIBEPAT, EPODOC, PAJ, WPI

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category*	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
A	US 2483114 A (VAN SCHOOR & DELBERT) 27 September 1949 (27.09. 49) the whole document.	1
A	GB 609691 A (DOWNHAM & CO) 5 October 1948 (05.10.48) Figures 1-4	1
A	FR 628178 A (DUJARDIN) 19 October 1927(19.10.27) the whole document.	1
A	GB 188468 A (TAYLOR) 16 November 1922 (16.11.22) Figures	1

 Further documents are listed in the continuation of Box C. See patent family annex.

* Special categories of cited documents:

- "A" document defining the general state of the art which is not considered to be of particular relevance
- "E" earlier document but published on or after the international filing date
- "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- "O" document referring to an oral disclosure, use, exhibition or other means
- "P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
